

Smarter Launch Pad

Launching your Smartsheet items automatically from an approved request.

We listen, we develop, we release. Our clients have been asking us if we could evolve our **Smarter Project Initialiser** app to automatically run and include request data in the newly created Smartsheet items.

We listened, we developed, we hereby release our new app:

Smarter Launch Pad

Simply start with a grid (tracker) sheet, receive & approve the request and the **Smarter Launch Pad** will create a set of new **Smartsheet** items, based on your pre-defined templates, with links from the request being shown in the newly created items and metrics flowing back to the tracker sheet to provide data for dashboard updates.

What can I use this for?

Any process that needs to track an individual item through a checklist of tasks.

For example:

- a Project Request that creates Project Plan & Dashboard and rolls up to a Portfolio Dashboard
- a Work Order Request that needs a Work Order Task List to track the order through to delivery
- a Job sheet whereby once a job has been approved, a checklist for that job is automatically created and reported on in dashboards at job and portfolio level
- etcetera ...

Is this the same as Smartsheet's Control Center?

No. Our Smarter Launch Pad is an app that will create new sheets based off a template automatically from a grid sheet. This is where the comparison ends. **Smartsheet's Control Center** provides more control over the items that are created, it has Global Updates, Archiving capabilities and more.

Then where does this app sit?

Smarter Launch Pad is great for clients that are looking to prove that **Smartsheet's Control Center** is the way to go but don't have the evidence or buy-in yet from Management to approve the spend.

We recommend using **Smarter Launch Pad** as a stepping stone to prove the concept works, at a lower level cost and then move onto Control Center when the business is ready. The move from **Smarter Launch Pad** to **Smartsheet's Control Center** will be smooth and painless as the design of the "blueprint" will have already been considered, tested and can be evolved as required.

In Summary - do you have...?

- ★ Different individuals creating your Smartsheet items/workspaces?
- ★ Inconsistent naming of your Smartsheet items?
- ★ Dashboards all reporting the same data but in many different ways?
- ★ A bottleneck in your workflow where you are waiting for the right person to set up the Smartsheet items manually?
- ★ The right skills to embed links into the newly created Smartsheet items to keep the data from being duplicated (sometimes incorrectly)

...then Smarter Launch Pad is your answer

*****Contact our sales department for further information on how to order this excellent add-on*****
