

# Smarter Forms

## Editing Smartsheet data – in a form!

**Smarter Forms**, a platform where you can edit existing data using **bespoke forms**

**With Smarter Forms, edit existing Smartsheet data in real time using a dynamic form**

### What our Smarter Forms can do for you

- Text, date, URL, contact list and text area input types
- **Cascading** dropdown lists
- Dynamically expose **custom list** options (as a sub selection of existing options)

### What our Smarter Forms can do for you

- **Conditionally Enable/Disable** controls based on other controls' values
- **Conditional value selection** based on other controls' values
- **Custom** headers, footers, labels and more!

### FULLY CONFIGURABLE APP

Runs on our servers **connected** to your **Smartsheet Assets**

Once set-up is configured, it runs within your **existing** IT environment

### ADVANCED FEATURES

**Cascading** drop-down lists

Conditional **logic**

### USER-FRIENDLY

The Smarter Forms configuration settings reside **in your own Smartsheet**.

To replicate an existing form for another sheet, just **copy and paste** a few lines
