

# Smarter Column Manager

Seamless. Effortless. Efficient.

Create, update, delete, and administer columns across all of your sheets

- **Administer** columns across **ALL** your sheets within a wizard

- **Instantly add** new columns to any of your sheets

- **Set** their type, lock status and visibility

For **any columns** in any sheet, quickly find and select them to:

- **update** the names
- **change** the column types
- **lock, unlock, hide, or show** the columns

- **Delete** selected columns:  
view columns by column name, sheet name, or location within the workspace and select them for deletion

Easily **roll out changes** to templates across already deployed sheets  
**in just a few clicks**

**Reduce inconsistencies and time spent in implementing and updating columns**

Make **multi-sheet reports** easier to create and analyse  
**Maintain** corporate structure
